iManage Webinar to Outline Strategies for Limiting the Impact of Security Breaches for Law Firms

Join us March 23rd to Learn Strategies for Securing Professional Client Content

WHAT: In today's world of relentless cyberattacks on law firms and other professional service firms, clients are demanding that more care is taken with their confidential materials. Even with regular user training in spear phishing tricks and other steps taken to secure the perimeter, the likelihood of a breach remains high.

Securing sensitive content on a need-to-know basis and segmenting other content appropriately within the firm are critical parts of any strategy to limit the exposure and reputational damage that a breach can bring. A new approach to data security is needed and with it software that can handle the volume and complexity of security policies is required.

Join us for this webinar to learn:

- How firms are being breached
- Strategies for limiting the impact of breaches
- Insights on implementing a need-to-know security model
- How to leverage AI and big data analytics for early breach detection

WHO: Heidi Shey, Forrester Senior Analyst, Security & Risk, CISSP; Ian Raine, iManage Director of Product Management; Aaron Rangel, iManage Director Product Marketing

WHEN: Thursday, March 23rd from 8:00-9:00 am PTD, 3:00-4:00 pm GMT

ATTEND: Click here to register today.
