Ask iManage

Secure, Compliant, and Trusted – Empowering Teams with Confidence

iManage
Making knowledge work

IT leaders and CIOs are under immense pressure to define and execute an AI strategy that delivers real value to end users while ensuring security and compliance. Ask iManage helps **technical decision-makers** cut through the hype, realize efficiency gains, and protect sensitive data — without disrupting existing workflows.

The challenge: AI expectations vs. reality

With AI at the center of boardroom discussions, IT executives must navigate a crowded marketplace filled with inflated claims. The challenge is twofold: separating real AI capabilities from the hype and implementing solutions that provide measurable benefits to their users without introducing security risks or operational disruptions.

Ask iManage: The powerful AI assistant

Ask iManage is built for secure use, offering immediate value while seamlessly integrating into your users' existing workflows. With Ask iManage, you can:

- **Capitalize on existing investments –** Show immediate value by accelerating work and augmenting legal professionals within the iManage platform, eliminating the need to switch applications.

- **Protect sensitive data –** Maintain governance, security, and compliance with an AI assistant that works entirely inside the DMS, ensuring sensitive content is never shared.

- **Integrate seamlessly –** Deploy Ask iManage seamlessly without overhauling existing systems or conducting new security audits, ensuring minimal disruption.

- **Cut through AI hype –** Partner with a trusted vendor that delivers proven, practical AI built within the existing Work application for easy adoption.

- **Be seen as a trusted partner –** Use Ask iManage to enable quicker decision-making with high-quality results legal professionals require.

Key benefits for your users

Ask iManage helps legal teams accelerate routine work and regain control over their workload—all from within their existing workflow in iManage. With one click, you can:

Summarize key positions in contracts and legal documents quickly.

Extract clauses across multiple agreements for review.

Analyze compliance by quickly reviewing whether documents align with stated policies.

Generate Q&A insights on key legal topics without time-consuming searches.

Create structured data tables — such as tracking contract terms across jurisdictions — to speed up analysis.

If teams want more flexibility, Ask iManage supports the ability to craft custom questions and maintain a question library so users can always reuse their work. Also, all Ask iManage responses include at least one evidence marker ensuring users can access additional context and work confidently.

Future-proof your AI strategy with iManage

By partnering with iManage, IT leaders can confidently implement Ask iManage to drive meaningful business impact — without compromising security or disrupting existing operations. Let's build your AI vision together.

Real AI. Real security. Real business outcomes.
