

EXTRACT DATA LOCKED IN LEGAL DOCUMENTS

Key Benefits

- **Increase productivity** – Review a greater number of documents and focus expensive resources on value-creating tasks rather than document processing tasks.
- **Improve quality** – Mitigate human error, apply quality assurance workflows, and build an auditable process to measure and improve quality.
- **Reduce cost** – Streamline and automate document processing tasks and get information for analysis into the right hands more quickly.
- **Decrease lead time** – Identify risks and opportunities sooner to make quicker, more informed business decisions.
- **Reduce risk** – Arm teams with the confidence all the right data and information is assessed allowing them to make the most accurate decisions.
- **Perform better** – Retain learnings and share extracted information across teams to ensure informed decisions and quick responses to changing conditions.

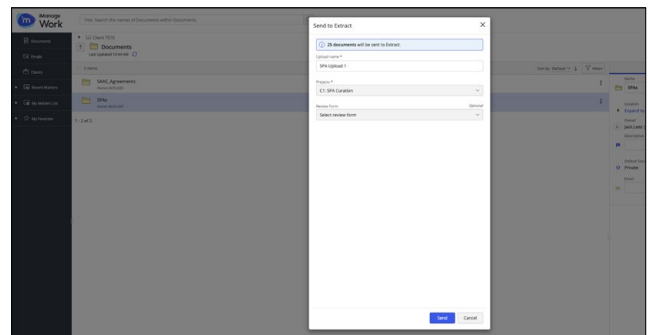

Organizations perform better and make more informed decisions when they have an accurate understanding of their position in legal documents. iManage Extract uses AI to automate the extraction of critical data points creating structured data that enhances the quality of legal and contract services. By transforming unstructured information from legal documents into useful structured data, organizations get more value out of existing documents, expedite review time, and leverage extracted data to gain insight into business and contractual risk, empowering teams to inform negotiations and make decisions faster.

How does it work?

Contract Intelligence uses five easy-to-use, flexible, and scalable features to support and automate tasks involved in contract and legal document review allowing organisations to get more value out of their contract data.

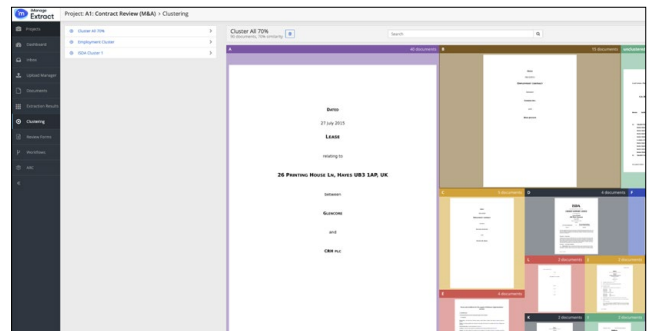

COLLECT

Connect to Work10 and other document repositories, upload using the Open API, or simply drag and drop.

CLUSTER & CLASSIFY

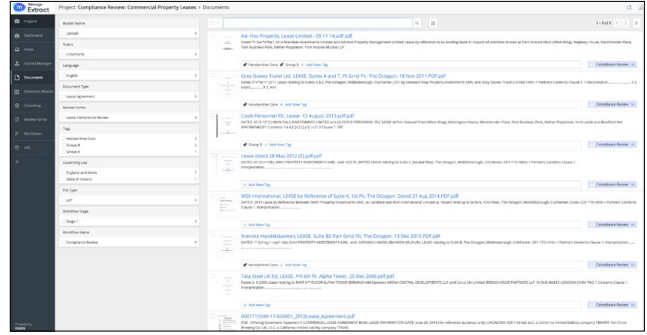

Use machine learning to cluster and classify documents based on content. Identify duplicates and classify documents by type. Extraction also can be used for further classification.

iManage Platform

The iManage platform delivers an optimal user experience on a modern architecture that makes it easy to deploy and speeds adoption allowing customers to realize value quickly. The iManage APIs and library of connectors enable integration with third-party sources seamlessly while still respecting industry leading security and governance.

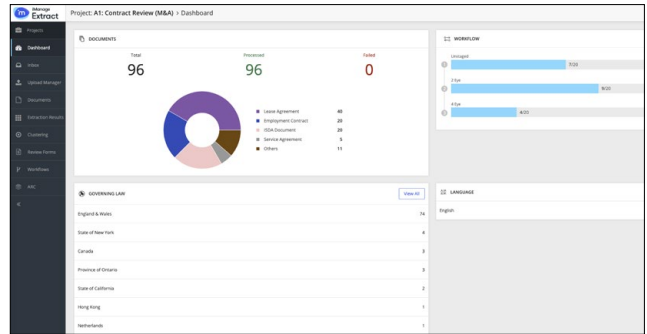

EXTRACT

Use extractors from the Extractor Library or easily train new extractors using the Extractor Toolbox to identify key information from documents. This provides the flexibility to address multiple use cases and grow and expand with the business.

WORKFLOW

The Extractor Toolbox includes tools that leverage both machine learning and regular expression extractors empowers our teams to select the most appropriate method, meaning we can deliver our client the best results, appropriate to the matter in question.

Laura Sanders
Legal Technology Manager,
DWF Law LLP

Create workflows to manage training, review, and quality assurance processes. Build workflow to enable augmentation of the extraction results. Assign the same workflow to different teams to enable reviews for consistency and track progress via the dashboard. Integrate with partners to build additional workflow around your extraction process.

SEARCH & EXPORT

Conduct bulk searches and connect to external systems using the iManage Pipeline API to export data, create dashboards, and populate documents. Export information into any format, add to your search solution for easy retrieval, and push into other third-party systems for further analysis.

About iManage™

iManage transforms how professionals get work done by combining artificial intelligence, security, and risk mitigation with market-leading document and email management. iManage automates routine cognitive tasks, provides powerful insights and streamlines how professionals work, while maintaining the highest level of security and governance over critical client and corporate data. Over one million professionals at over 3,000 organizations in over 65 countries – including more than 2,000 law firms and 500 corporate legal departments – rely on iManage to deliver great client work – securely.
