2ND
Data modernization
Ranked No. 1 or 2 by 44% of respondents

3RD
Cost and IT performance
Ranked No. 1 or 2 by 32% of respondents

iManage Cloud is designed from the ground up to be cloud native

Key characteristics of the modern cloud-native platform

Microservices allow iManage and partners to quickly deploy production-ready applications aligned with customer needs.

Containerization encapsulates applications into a single package, increasing agility and security.

Operational services provided by **Microsoft Azure** allow iManage to focus on enhancing platform features and functionality.

Automation increases speed, quality, and performance of iManage applications with automated, consistent, and repeatable deployments.

The importance of being cloud native

Unlike fine wine, technology does not improve with age – and cloud is no exception. iManage has invested in developing a platform from the ground up that leverages the most innovative cloud technologies. This means no downtime for upgrades and patches, unlike others in the market, plus cutting-edge security and immediate access to the latest advancements.

iManage cloud-native platform improves your business performance

Cultivate greater efficiency for your organization

Relieving tech teams of non-essential duties enables them to concentrate on important business functions.

Customer responsibility

iManage responsibility

Advance at a greater pace

Be agile and move at your own speed, with resources and new services available when you need them.

Eliminate complex, expensive upgrades and the continual need to buy new hardware.

Predictable costs reduce complexity in finance and procurement.

Highly scalable services match your business requirements for greater agility.

Eliminate downtime and ensure peak productivity with immediate access to new releases.

Fortify security with automated updates and patches that ensure you're always protected.

Innovate and grow

Grow your business with the latest innovations **only available in the cloud.**

iManage Tracker

Adopt market-leading security

Reap the benefits of the highly resilient and secure iManage Cloud.

With **leading ISO certifications** iManage Cloud meets the most stringent security requirements.

Comprehensive cloud security built on **Zero Touch and Zero Trust architecture** affords the strongest possible protection of your vital information.

Need-to-know security with information barriers and active threat detection restricts data access to only those who should have it.

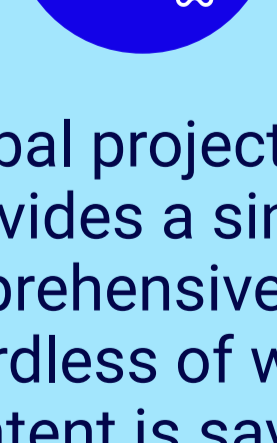

Data sovereignty improves regulatory compliance with a single point of access to work with any colleague in any geography.

24/7 monitoring with daily updates and security patches ensures everyone is working securely.

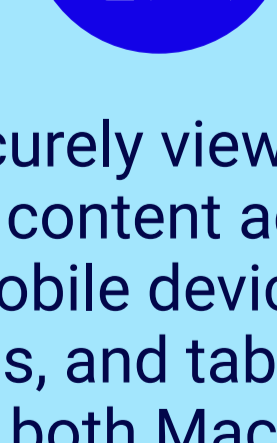

Work anytime, anywhere

Carry out work-related tasks without being constrained to a specific location or schedule.

Global project file provides a single view regardless of where content is saved.

Securely view and edit content across mobile devices, PCs, and tablets, for both Mac and Windows.

Your content is secure and accessible wherever you are.

iManage Cloud invested in your success

“ iManage isn't just for big firms. Organization is key when you're working with a lot of data. If you can't find your documents, or you have version control issues, that's a huge problem. Those are challenges we just don't have any more. Now we can't imagine life without iManage.
