# iMANAGE ENABLES EVERY LAW FIRM TO WORK SMARTER

iManage
Making knowledge work

## iManage helps mid-size law firms respond to a changing legal market by becoming more agile, productive, and secure

### Key Benefits

- **Work productively:** Manage documents and emails more efficiently and intuitively

- **Work from anywhere:** Mobile-first design lets users work remotely on any device

- **Find anything:** Smart search cuts through clutter to deliver personalized results

- **Work smarter:** Streamline everyday tasks like emailing documents and saving work to custom folders

- **Work seamlessly:** Integrations with Office 365 enable users to do more from inside the familiar Office and Outlook interfaces

- **Work Safer:** Industry-leading security and governance ensures that iManage Work is the safest place to store information

### Document + Email Management

- **iManage Work:** Secure document and email management

- **iManage Share:** Secure, governed file sharing and collaboration

- **iManage Drive:** Easy to use, Windows-based interface to iManage Work

The market for legal services is evolving rapidly, and law firms of all sizes have been forced to react to new business pressures and changing client expectations. Mid-size law firms are adopting modern document management solutions to help attorneys work more productively and enable the firm to be more agile. iManage is the industry's leading document and email management application, relied on by global corporations and law firms, including more than 1,900 mid-size and regional firms.
iManage's cloud-based applications deliver powerful tools to help mid-size firms transform information into a competitive advantage, while reducing IT cost and complexity. The iManage platform enables firms of every size to manage the entire document lifecycle with integrated security, risk and governance applications, and embedded artificial intelligence capabilities.

## Relied on by global corporations and law firms
1,900+ mid-size and regional firms

**Work productively –** iManage enables attorneys to manage documents and emails more efficiently, providing a single resource where documents and emails are saved and organized by client and matter, so high-value information is managed and secure. Attorneys access information via a simple modern user interface that mirrors consumer applications like Amazon and Google. iManage is engineered from the ground up to deliver a more intuitive user experience that requires minimal training and drives user adoption.

**Work smarter –** iManage includes smart features that anticipate user needs and enable them to work intuitively and productively. For example, iManage Work displays document history in visual dashboards and Facebook-like timelines, so users can identify changes at a glance. It analyzes and predicts user actions, with smart document previews, suggested filing locations, and flexible work folders.

**Find anything –** The core value of modern document and email management is in giving attorneys the power to quickly and efficiently find content, so they can apply existing precedent, and make better use of institutional knowledge. iManage delivers sophisticated personalized search that cuts through the clutter and delivers more accurate results by remembering what the user searches for and how they work.

**Collaborate securely –** Secure collaboration with clients and across the firm is essential for law firms and attorneys. iManage enables secure, governed content sharing and collaborative workspaces, all with a single click and without interrupting workflow.

**Work Safer –** Law firms must be able to protect proprietary legal information and demonstrate their commitment to data security to their clients. Mid-market firms with smaller IT teams can find it particularly challenging to respond to the changing security landscape. iManage enables firms of every size to offer comprehensive security protections for all client data, as well as advanced perimeter security and encryption, need-to-know security and ethical walls, and active threat detection. iManage delivers comprehensive, pervasive and unobtrusive security and governance across the entire information lifecycle.

**Deploy in the iManage Cloud –** For mid-size law firms with limited IT resources, the iManage Cloud offers the fastest and simplest way to implement document management while minimizing cost and complexity. The iManage Cloud offer unique and differentiated reliability, performance, and security, while minimizing the burden on your IT department:

- Industry-leading 99.992% uptime and availability, monitored in our real-time customer Trust Center
- Optimized user performance to deliver the fastest upload and download speeds available
- Comprehensive security protections, enabled by our Zero Trust architecture, and vetted by the most demanding and security-conscious organizations

The iManage Cloud enables mid-market law firms to level the playing field and compete more effectively with larger organizations.
