

iManage Cloud vs on premises feature comparison

iManage Cloud feature comparison		
	On premises	iManage Cloud
Single Global Endpoint	⊖	☑ Regardless of their location, users can access iManage Work using the cloudmanage.com endpoint and are automatically directed to the nearest data center, while still maintaining country-specific data privacy regulations.
Global Matter File	⊖	☑ Generate a single comprehensive view of information for a specific client, matter, or project, regardless of where the content is saved around the world. Users can now search across all libraries and see global results aggregated and presented in a single result set.
Microsoft Teams Integration via iManage Teams App	⊖	☑ Tight integration with Microsoft Teams enables easier collaboration and creation of content while maintaining iManage document security and governance protections.
Embed iManage Workspace in Microsoft Teams	☑	☑
Advanced Co-authoring	⊖	☑ If your organization uses Office 365, they can easily work together to create and edit documents in co-authoring mode while working from any location. Multiple users can simultaneously review and edit documents, right from iManage Work.
Per-file Document Encryption	⊖	☑
Global User/Group Management	⊖	☑
SCIM Support (Azure AD)	⊖	☑
Microsoft Power Automate Connector	⊖	☑
Connect to content in iManage Work as part of larger workflows or to automate repetitive tasks.		
Advanced Password Management	⊖	☑
iManage Tracker Integration	⊖	☑
Task and checklist management to improve work visibility, reduce risk, and empower knowledge workers.		
Upcoming Features Management	⊖	☑
Mobility iOS (Native)	☑	☑
Mobility iOS (Blackberry Dynamics)	☑	☑

iManage Cloud feature comparison (continued)

	On premises	iManage Cloud
In-app Notifications for New Features	⊖	☑
Advanced User Analytics (opt-in)	☑	☑
Leverage Azure CDN for Web Static Asset Delivery	⊖	☑
Supports Limited Rights System Users (SPM, IRM, User Mgmt)	⊖	☑
Subdomain Support	☑ (Up to customer to configure and manage)	☑ Built-in at application-level

iManage AI

	On premises	iManage Cloud
Ask iManage	⊖	☑ Built into the fabric of iManage Cloud, Ask iManage can quickly source information across an organization's documents by posing natural language queries. Users can search for specific types of documents, extract specific data points within documents, and ask follow-up questions.
AI Enrichment	⊖	☑ iManage AI Enrichment provides the vital data architecture and classification organizations need to ensure a successful delivery of their AI strategy. AI Enrichment automatically classifies documents by type, extracts key information points, and saves the information with the document, enabling more accurate search and improved productivity.
Mailbox Assistant	⊖	☑ iManage Mailbox Assistant introduces a better way to manage the email inbox, improving productivity and information governance. Building on organizational and individual user behavior, Mailbox Assistant uses AI to intelligently identify where email and attachments should be stored, saving valuable time, helping establish definitive single sources of truth, and strengthening information governance efforts.
